COORDINATION CHEMISTRY REVIEWS

# Contents

*Preface* . . . . . 1

Organometallic complexes as luminescence probes in monitoring thermal and photochemical polymerizations
A.J. Lees . . . . . 3

Solvent effects on metal to ligand charge transfer excitations
N.S. Hush and J.R. Reimers . . . . . 37

Electroabsorption spectroscopy of charge transfer states of transition metal complexes
B.S. Brunschwig, C. Creutz and N. Sutin . . . . . 61

Photoreactivity of metal-to-ligand charge transfer excited states
A. Vogler and H. Kunkely . . . . . 81

Metal–CO photodissociation in transition metal complexes: The role of ligand-field and charge-transfer excited states in the photochemical dissociation of metal–ligand bonds
E.J. Baerends and A. Rosa . . . . . 97

Ligand-dependent excited state behaviour of Re(I) and Ru(II) carbonyl–diimine complexes
D.J. Stufkens and A. Vlček, Jr . . . . . 127

A quantum chemical investigation of the metal-to-ligand charge-transfer photochemistry
D. Guillaumont and C. Daniel . . . . . 181

Excited states of transition metal complexes studied by time-resolved infrared spectroscopy
M.W. George and J.J. Turner . . . . . 201

Mechanistic roles of metal-to-ligand charge-transfer excited states in organometallic photochemistry
A. Vlček, Jr. . . . . 219

Charge-transfer excited state properties of chiral transition metal coordination compounds studied by chiroptical spectroscopy
M. Ziegler and A. von Zelewsky . . . . . 257

Photoinduced energy and electron transfer processes in rigidly bridged dinuclear Ru/Os complexes
L. De Cola and P. Belser . . . . . 301

Applications of functionalized transition metal complexes in photonic and optoelectronic devices
K. Kalyanasundaram and M. Grätzel . . . . . 347

**The table of contents of *Coordination Chemistry Reviews* is included in ESTOC – Elsevier Science Tables of Contents service — which can be accessed on the World Wide Web at the following URLS:**
